

# MASEGO MONGALE

## UX DEVELOPER

### PROFILE

As a UX developer with over 7 years of experience in UI/UX, I have honed my skills in creating user-centric designs that balance aesthetics, usability, and functionality. I completed my National Diploma in Information Technology, specializing in Multimedia. Over the years, I have developed expertise in a wide range of design tools such as Adobe Creative Suite, Figma, and more. I have also developed proficiency in HTML, CSS, and JavaScript, Angular CLI, React JS, which has enabled me to create responsive designs that work across different platforms.

I believe that my background in UX design will be invaluable in helping to create solutions that are not only functional but also user-friendly. I am confident that I can work collaboratively with developers and other team members to deliver innovative and user-centric designs that meet the needs of the business.

UX Developer | Exponent (Vodacom HR Unit)

FEB 2023 - CURRENT

- Collaborate with the UI/UX team.
- Conduct UX research to gain empathy and understanding of the business goals and user needs.
- Define the user journey and scenario storming that will help meet business requirements.
- Design interactive and responsive prototypes and wireframes using Figma.
- Conduct user testing to gain feedback and update designs.
- Obtain sign off from stakeholders and Product owner.
- Develop minimal and lovable web application templates in Angular Material and conduct testing while improving the user experience.
- Design UAT packs and FAT docs to align with the development and requirements on JIRA.
- Conduct testing and update templates based on user feedback and business.
